OUR HISTORY
Since 1986, Metropolitan Veterinary Associates® and Emergency Services has provided the highest quality of veterinary medicine. It is our mission to enhance and improve the lives of our patients through exceptional care. To aid this mission we are practicing out of a renovated 24,000 square foot facility with state-of-the-art diagnostic and therapeutic equipment. We concentrate on multi-discipline specialty and emergency cases, allowing us to work in concert with referring veterinarians to provide our patients with complete care.

OUR MISSION
We strive to provide unsurpassed veterinary care to improve and enhance the quality of life for our patients.

OUR LOCATION

Is your pet a bad traveler? Just don’t want them in the car longer than necessary? We’re closer than you think! Locations in the orange circle are about 15 minutes from our hospital, towns in the blue circle are approximately 30 minutes away. Need directions? Give us a call!

OUR AREA

We are a 24/7 PRACTICE. We are NEVER CLOSED. We are ALWAYS AVAILABLE.

Providing Specialized Veterinary Services & 24 HOUR EMERGENCY CARE
DID YOU KNOW?
Were you aware that Metropolitan offers you the following:
• A monthly Pet Loss Support Group
• Quarterly free of charge Dog & Cat First Aid/CPR Classes
• A non-profit organization “Paws of Promise” to help good owners who are having trouble funding a pet’s emergency care

For more info visit Metro-Vet.com.

OUR SERVICES
With an extensive team of 27 specialists in 12 different disciplines, Metropolitan Veterinary Associates® offers the highest standard of advanced veterinary care. Not only do our doctors have years of experience and a well-trained support staff, but they also have access to cutting edge technology and sophisticated diagnostic imaging. We are the Premier Veterinary Specialty Hospital in our region.

EMERGENCY & URGENT CARE
When your pet requires emergency care or after hours medical attention, Metropolitan Veterinary Associates® is available. We are open 24/7 to accommodate you and address your pet’s needs. With highly trained doctors available around the clock, and access to state of the art facilities, we provide prompt, exceptional emergency care.

CARDIOLOGY
The cardiology service offers expertise in congenital and acquired cardiac diseases as well as cardiac manifestations of systemic disease. Available diagnostics include: echocardiography (cardiac ultrasound), electrocardiography (ECG), radiographic interpretation, blood pressure management and Holter monitoring. In addition, we provide diagnostic fluoroscopy as well as an array of cardiac and non-cardiac intervention procedures. Our board certified veterinary cardiologist along with our team of technicians provide a love for the field, thorough and compassionate patient care and open communication with your family veterinarian.

Michael S. Miller, MS, VMD, ABVP
Risa Roland, DVM, DACVIM (Cardiology)

DERMATOLOGY
Our dermatology service has expertise in the diagnosis and treatment of disorders affecting your pet’s skin, hair and nails. We have extensive experience in treating both benign and malignant skin lesions, persistent skin irritations, and also offer diagnostic allergy testing for the treatment of your pet’s allergies.

Karen B. Farver, DVM, DACVD

INTERNAL MEDICINE
The internal medicine service offers highly trained specialists with experience in the diagnosis and treatment of disorders affecting the gastrointestinal, urinary, hematologic (spleen and blood), hepatic, endocrine and respiratory systems. This service also includes endoscopic procedures of the esophagus, stomach, intestines, colon, nasal cavity and urinary tract. In addition, laparoscopic surgery is also performed most commonly to obtain high quality liver biopsies. Our doctors will then work with your primary veterinarian to provide long-term care.

John V. DeBlasio, DVM, DACVIM
James F. Dougherty, MS, VMD
Leslie A. Kuczynski, VMD, DACVIM

INTERVENTIONAL RADIOLOGY
• Arterio-Venous Fistula Embolization
• ASD Occlusion
• Balloon Valvuloplasty
• Catheter Retrieval
• Chemoeombolization
• Coil Occlusion
• Diagnostic Angiography
• Diagnostic Fluoroscopy

Risa Roland, DVM, DACVIM (Cardiology)

MINIMALLY INVASIVE SURGERY
• Arthroscopy
• Endoscopic Polypectomy/ Mass Resection

John V. DeBlasio, DVM, DACVIM
Sherman O. Canapp Jr., DVM, MS, CCRT, DACVS, DACVS-MR

NEUROLOGY
The neurology service is trained to diagnose and treat diseases affecting the central nervous system, spinal cord, nerves, and neuromuscular system. With a wealth of experience to draw on and routine access to both MRI and CT imaging, our neurologist will guide your pet through whatever treatment is necessary.

Jerry W. Northington, DVM

ONCOLOGY
Our Oncology service concentrates on the care of patients diagnosed with cancer. A focus is placed on education to help owners understand their pet’s condition in order to make the most informed decision possible regarding treatment. Advanced cancer therapies are used to treat patients, and recommendations may include surgery, chemotherapy, or radiation therapy. Treatment plans also consider all aspects of the pet’s health including pain relief, nutrition, and complementary therapies. By aggressively managing patient discomfort and any possible side effects, we anticipate that many pets will enjoy a higher quality of life than they did prior to diagnosis.

Suzanne Rau, DVM, DACVIM (Oncology)

OPHTHALMOLOGY
Animals can suffer from the same eye problems as humans. Our ophthalmology service is fully equipped to address the difficulties your pet may encounter involving everything from cataracts to traumatic injuries and corneal abrasions. We have trained specialists with the extensive experience necessary to ensure the health of your pet’s eyes.

Amanda Corr, VMD, DACVO
Stephen L. Gross, VMD, DACVO

RADIOLGY
This service offers a broad range of advanced diagnostic imaging and talented radiological staff to aid in interpretation. Along with producing digital radiographs, our board certified veterinary radiologist also directs other imaging technologies such as ultrasound, digital fluoroscopy, computed tomography (CT), MR interpretation and radioactive iodine to treat feline hyperthyroidism. CT, MRI and nuclear medicine are all available onsite. Nuclear medicine (radioiodine I-131) is a specialized treatment for cats with hyperthyroidism and is the only completely curative treatment option available for cats with this condition.

Robert C. McLean, VMD, DACVR
Lisa Suslak, VMD, DACVR

SURGERY
The surgery service is here to provide highly trained surgeons with a comprehensive set of state-of-the-art surgical techniques for your pet’s care. Our surgeons routinely work with other specialists in internal medicine, neurology, and radiology, as well as with your primary veterinarian to ensure complete care before and after your pet’s surgery.

Lori W. Cabell, DVM, DACVS
A. Jon Nannos, DVM
Jacqui Niles, BVetMed, SAS, DACVS
Catherine Popovitch, DVM, DACVS, DECVS
