BEGINS
6:30PM

CHADWICK'S | 2750 EGYPT ROAD | NORRISTOWN

This engaging lecture will review the causes of respiratory difficulty due to both respiratory and cardiac diseases. Topics include historical and physical examination findings, diagnostic tests, and therapeutic approaches to manage patients with respiratory difficulty due to cardiac and respiratory disease. We will also review case studies highlighting patients with respiratory difficulty.

SPEAKER:

Risa Roland, DVM, DACVIM (Cardiology)
